Criteria: This page should only be deleted when consensus is reached Cause: See Call-Selected servers Image of all servers offered in Bedrock version This feature is exclusive to bedrock version. Selected servers are community servers for Bedrock Edition, which partner with Mojang Studios and are accessible from the in-game server level. In console versions, they are the only servers that are accessible except domains. Although bedrock edition lacks mini games of legacy console edition, selected servers can have their own minigames to play online. Select servers require a Microsoft account[1] and require a paid multiplayer subscription on consoles only. However, they have microtransmits that can be purchased from their own segments of Marketplace. Selected servers were first added as part of 1.2.0, the update is better combined. There are currently six selected servers, and Mujiang Studios plans to add more in the future. Server owners with registered business identities can apply for the affiliate program. Mujiang Studios provides partner servers with out-of-end support.
